Municipal Info

JUNE 2026 #2

TOWN HALL CLOSURE

We would like to inform you that the Town Hall will be closed on the following days:

- **Tuesday, June 16 (afternoon) and Wednesday, June 17: I will be attending a conference.**
- **Wednesday, June 24: St-Jean Baptiste Day holiday.**
- **Wednesday, July 1: Canada Day holiday.**

SEPTIC SYSTEM AND WELL INVENTORY

Some time ago, we sent you a letter requesting information about your septic systems and wells. Some residents have already replied, but responses from others are still outstanding.

We invite you to send us this information by **JUNE 30, 2026**. Otherwise, **the inspector will have to conduct an in-person visit**. It is essential that the municipality has a complete inventory of all septic systems and wells within its territory. Without this inventory, we risk losing the TECQ grant, which is used for paving municipal roads.

If you no longer have the letter to return, you can download it from our website under the tab: municipality → citizens → press releases → 01 information collection – inventory – bilingual. You can also contact us so that we can provide you with a new one or come to the town hall where we can help you complete the information.

WETLAND PROTECTION AND EMBANKMENT REGULATION:

The MRC's interim control bylaw 340-2023, in effect since March 2024, aims to ensure the compatibility of the land-use planning regime with the regional wetlands and water resources plan. It primarily regulates interventions in presumed wetlands and their buffer zones, generally prohibiting embankment activities in these areas and within a 10-metre buffer zone around them.

However, certain interventions may be authorized depending on the ecological value class of the area, particularly for public infrastructure, public safety needs, certain agricultural equipment, or work already authorized.
The by-law also includes specific prohibitions, such as the construction of new ditches and agricultural drain outlets within 15 m of class a or d wetlands.

The by-law also regulates backfilling activities in permanent agricultural zones to protect agricultural soils and groundwater: backfilling, excavation, and raising are permitted only under specific conditions (e.g., maximum area of 2 ha, recommendation and supervision by an agronomist, preservation of topsoil, and restoration within 6 months), with a possible exception for certain landscaping projects under 2,000 m² (once per property). many projects require a municipal permit, and when work is carried out near a wetland, a site characterization study that meets the requirements of the MELCCFP (ministry of the environment, climate change and forests) may be required.

REMINDER – REMINDER – REMINDER

For everyone's safety, we encourage you to trim tree branches along your driveway. This will allow fire trucks and ambulances easier access to your home in case of an emergency.

Your cooperation is essential to ensure a quick and effective response when needed. Thank you for your understanding and for contributing to the safety of our community.

We would like to remind you that it is **ILLEGAL** to blow grass clippings, leaves, or any other debris onto the roadway.

In addition to being prohibited, this action can be dangerous for motorcyclists, cyclists, and pedestrians, especially when the grass is wet, making the roadway slippery.

To ensure everyone's safety, please dispose of your waste responsibly. Together, let's keep our municipality safe and clean!

Thank you for your cooperation.
